

# CASHIER/CUSTOMER

# PROTECTIVE BARRIERS

**Super Color Digital and Laird Plastics have teamed up to create a transparent Polycarbonate Safety Barrier sneeze guard. The barrier is constructed out of clear polycarbonate, which are used in a wide range of applications, such as high-performance windshields, car headlights, eyeglass lenses, bullet proof “glass,” and panels used to construct greenhouses. Like safety glass, this barrier is designed to be stronger and more durable than ordinary glass. Best of all, the barrier can be mounted to nearly any counter or cash register area.**

**Most retail cashiers and customers are well within the recommended “6’ social distancing” requested by the CDC guidelines. While these clear barriers are not a medical filter, they do have the ability to create a buffer between the customer and the cashier. The buffer helps deflect a large number of airborne particles that may be produced by an involuntary cough or a sneeze. Your customers and employees will feel safer and be safer with this polycarbonate safety barrier.\* Barriers are available to ship overnight if needed.**

**Please place your order as soon as possible, demand for these barriers is increasing every day and are available on a first come first service basis. Orders can be placed by calling your Super Color Digital account rep or by calling 800.979.4446.**

**\*Shield is not a medical shield**
