

INFECTION CONTROL **PPE FACE SHIELDS**

As COVID-19 continues to grow and infect more people, demand for protective PPE products has grown. Safety and the health of our community continue to be our top priority, and this is why Super Color Digital has developed PPE infection control protective face shields.

Made from high-performance PETG, our face shields are bendable yet very sturdy. Combining clarity with durability, our infection control face shields provide a clear line of sight with no obstructed views. Designed to also be comfortable over long periods of wear, our infection control face shields also fit over eyewear and N95 face masks. Able to withstand harsh environments, our face shields are ideal anywhere close contact occurs.

As need for face shields has grown, we have answered the call by donating face shields to St. Joseph Mission Hospital in Mission Viejo, California. This hospital is currently helping a growing number of patients affected with COVID-19.

Please place your order as soon as possible, demand for our face shields are increasing every day and are available on a first come first serve basis.

You can place your orders by calling your Super Color Digital account rep directly or by calling 800.979.4446.
